

AUTONOMOUS WARFARE

Proof, Cost Exchange and Accountability for the Autonomous Warfare Command

RESILIENCE, WEAPONIZED.

THE REQUIREMENT

A four-star Autonomous Warfare Command is being built through Project Agincourt and DRPM-UxS, backed by a \$54.6 billion FY27 request for the Defense Autonomous Warfare Group. The primes will build the drones. The command still has to know which systems work, what each defeat costs and who decided what, on what data.

The output is **"not a particular drone, but the ability to adapt in combat, on the right side of the cost exchange."**

PROJECT AGINCOURT MEMORANDUM · SEPT. 30, 2026

WHAT AZTECH DELIVERS NOW

DRAGONFLY

ADAPTATION LOOP SCORECARD

Test events, field use, exercises and vendor claims in one graded scorecard.

- Every result graded A–F / 1–6 by source and sample size
- Plain-English questions, answered with the reading shown
- Vendor-only systems flagged and ranked below tested ones

NEW · OCTOBER 2026

MONTEZUMA

COST PER KILL · SWARM RED CELL

Wargames the cost exchange, then sends results to DRAGONFLY in one click.

- Cost per kill and exchange ratio vs. the threat's cost
- Attributable-only vs. exquisite-only comparison
- One-way-attack swarm with a red cell that adapts

NEW · OCTOBER 2026

MONTEZUMA

DECISION LEDGER

Every engagement decision becomes a dated, attributable record.

- Named decider and the authority they acted under
- Data relied on, with its age; stale data flagged
- Contrary reporting kept; SHA-256 hash chain

NEW · OCTOBER 2026

WHERE THE COMMAND WILL FEEL THE GAPS

GAP	AZTECH ANSWER	STATUS
Proof of performance	DRAGONFLY scorecard across test events, graded by source	AVAILABLE
Cost exchange	MONTEZUMA cost per kill, exchange ratio and tier-mix comparison	AVAILABLE
Decision record	MONTEZUMA Decision Ledger, re-verified across platforms in GOLD	AVAILABLE
Counter-UxS & PNT	OCELOT threat records · RAVEN EMS operations · HUMMINGBIRD route risk · SHAMAN incursion cases	AVAILABLE
Supply chain & ATO	ORCA drone industrial base · CAIMAN undersea · ATO evidence pack	AVAILABLE
Trained people	Aztech Academy · Autonomous Warfighter path · verifiable certificates	AVAILABLE

HOW WE FIT

- **A bolt-on, not a rival.** Works beside Maven, Lattice and the primes' autonomy stacks; never a second common operating picture.
- **Operator-built, accountable AI.** 26 years supporting SOCOM, the Department of War and the Intelligence Community; every finding is graded and AI output waits for human review.

READY FOR

- DRPM-UxS warfighting acquisition and DIU solicitations
- JIATF-401 counter-drone evaluation and data
- Fast-track ATO: audit trails export as evidence
