WHO WE ARE

Aztech City LLC (Aztech) is a cleared, SBA-certified Service-Disabled Veteran-Owned Small Business in Falls Church, Virginia. We build proprietary, AI-enabled analytic platforms that turn complex, multi-source data into decision-ready intelligence for defense, intelligence, law enforcement and civilian agencies, from the SCIF to the tactical edge.

Founded by a Navy veteran with 26 years supporting SOCOM, the Department of War, the Intelligence Community and federal civilian agencies, Aztech pairs mission-level insight with auditable AI: every finding is graded, sourced and reviewable.

CORE COMPETENCIES

ALL-SOURCE ANALYSIS & DATA FUSION

AI/ML, multi-INT fusion and entity resolution that turn raw reporting into graded, traceable findings.

ANALYTIC TRADecraft & VALIDATION

Structured review of draft assessments, NATO STANAG 2511 source grading and end-to-end provenance.

WARGAMING, RED TEAMING & DECISION SUPPORT

Doctrine-grounded adjudication, adaptive red cells, counter-options and commander-ready briefs.

MISSION SOFTWARE ENGINEERING

Rapid, modular builds with swappable model endpoints, ready to point at accredited FedRAMP High, IL5 or IL6 hosting.

INTERNATIONAL RESEARCH & POPULATION ASSESSMENT

Nationally representative surveys, focus groups and longitudinal baselines across multiple regions.

PAST PERFORMANCE

Aztech is a prime contractor to the U.S. Department of State, delivering multiple firm-fixed-price research programs for the Bureau of Intelligence and Research. Each demands rigorous design, multi-country field execution, secure data handling and on-schedule analytic products for an intelligence community customer that keeps coming back.

PRIME CONTRACTOR

Accountable for cost, schedule, quality and subcontractors.

REPEAT CUSTOMER

Successive awards from the same IC customer.

END-TO-END DELIVERY

Design, fielding, QC, analysis and secure delivery.

MISSION AREAS WE SERVE

WHY AZTECH

CLEARED & MISSION-READY

Active Top Secret Facility Clearance and cleared leadership.

OPERATOR-INFORMED

Built by a Navy veteran with 26 years supporting SOF and the Intelligence Community.

ACCOUNTABLE AI

Every finding carries a reliability and credibility grade; AI output stays flagged until an analyst reviews it.

BUILT FOR REAL CONDITIONS

Designed for SCIF, disconnected and contested networks, with Cursor-on-Target export to ATAK.

PROPRIETARY TECHNOLOGY

Platform Portfolio

13 MISSION-DRIVEN PLATFORMS
ONE ACCOUNTABLE AI CORE
WHOLLY OWNED · SELF-FUNDED

MONTEZUMA WARGAMING

FLAGSHIP

AI-assisted wargaming: seven adjudication modes, an adaptive Red Cell, counter-options and Commander's Briefs. Selected for USSF Kronos CSO Phase 1B.

MISSION ► WARGAMING, EXERCISES & PLANNING

OCELOT MULTI-INT & COUNTER-UXS

Fuses air, surface and subsurface tracks with pattern-of-life analytics (go-dark, loiter, rendezvous, AIS spoofing); Cursor-on-Target export to ATAK.

MISSION ► ALL-SOURCE FUSION, DOMAIN AWARENESS

RAVEN EW & SPECTRUM

Confidence-scored Electronic Order of Battle, direction finding and spectrum deconfliction: an assessment and C2 layer on existing sensors, not a collector.

MISSION ► SPECTRUM OPERATIONS & EW

CAIMAN UNDERSEA INFRASTRUCTURE

Maps subsea telecom cables, power interconnectors and landing points by depth, fused with vessel activity to expose risk to undersea infrastructure.

MISSION ► CRITICAL INFRASTRUCTURE PROTECTION

EAGLE VEHICLE & ROAD INTEL

VIN decoding, recall and complaint history, carrier safety vetting and road-corridor disruption from authoritative federal data, with hand-off to SHAMAN.

MISSION ► LAW ENFORCEMENT & TRANSPORTATION

TURQUOISE TALENT ACQUISITION

NEW

AI-assisted sourcing, screening and pipeline management for cleared and hard-to-fill roles, with a FedRAMP-authorized hosting path through established partners.

MISSION ► FEDERAL & CLEARED HIRING

GOLD PLATFORM HUB

Single front door to the Aztech platform family: live cross-platform status and AI-synthesized action reports drawn from every platform's published findings.

MISSION ► ENTERPRISE INTEGRATION

SHAMAN INVESTIGATIONS & OSINT

FLAGSHIP

Case-scoped entities, evidence and timelines with SHA-256 hashing, chain-of-custody logging, Admiralty source grading and court-ready packets.

MISSION ► INVESTIGATIONS, CI & LAW ENFORCEMENT

ORCA CHOKEPOINTS & LOGISTICS

Ranks global maritime chokepoints by severity using live IMF PortWatch transits and GDELT reporting; tracks prepositioned stocks for contested logistics.

MISSION ► CONTESTED LOGISTICS & SUPPLY CHAIN

HUMMINGBIRD SPACE & PNT

Live orbital picture, maneuver and anomaly detection from 90-day element history, GEO proximity checks and GPS-interference correlation.

MISSION ► SPACE DOMAIN AWARENESS & PNT

SERPENT INFLUENCE ASSESSMENT

Measures whether an influence or PSYOP campaign moved a population against its own pre-campaign survey baseline. Assessment, not collection.

MISSION ► INFLUENCE OPS & PUBLIC DIPLOMACY

DRAGONFLY ANALYTIC REVIEW

NEW

Analytic validation engine that reviews draft assessments before release. Import products in PDF, Word or text; it flags weak sourcing and unsupported judgments.

MISSION ► ANALYTIC QUALITY & REVIEW

OBSIDIAN VULNERABILITY RESEARCH

R&D

Reasons about why a software weakness exists and where it may recur, testing each hypothesis against an adversarial skeptic. Research, not exploit generation.

MISSION ► CYBER & VULNERABILITY RESEARCH

AZTECH-SENTINEL-CORE

The shared accountability layer: every finding in MONTEZUMA, SHAMAN, OCELOT, ORCA, SERPENT and RAVEN carries a NATO STANAG 2511 grade (A–F / 1–6), and AI output waits for human review.
